Art Unit 337

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-33 and 46-61 are, drawn to card embossing system, classified in Class 101, subclass 18.

II. Claims 34-45, drawn to topping system, classified in Class 156, subclass 384.

Inventions I and II are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In the instant case, invention I has separate utility such as it need not be topped and the topping card system need not use the specific embossing system of invention I. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed.
